Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Maeda (JP03109760).

Maeda (Fig 1, 2) discloses a stacked semiconductor chip package comprising: a substrate (12); a first chip (8) mounted on the substrate and electrically connected (11) to the substrate by a plurality of electrical leads; a second chip (4), electrically connected to the substrate by a plurality of electrical leads and having two opposed longitudinal sides defining a first length (horizontal; Fig 3); and a plate portion (3), mounted between the first chip and the second chip and connected to the first chip and the second chip (via 1), corresponding to the two longitudinal sides of the second chip, the plate having two opposed longitudinal sides defining a second length, the second length being larger than the first length to expose the opposed longitudinal sides of the plate (Fig 2; perspective along stack formation); wherein corresponding to the two longitudinal sides of the second chip, the first chip has two opposed longitudinal sides defining a third length, and the third length is larger than the second length; wherein corresponding to the two longitudinal sides of the second chip, the second chip further has two opposed traverse (vertical direction) sides defining a first width, the plate further

has two opposed traverse sides (Fig 1, portion of bar portion) defining a second width, the second width is smaller than the first width; and the first chip has two opposed transverse sides defining a third width, and the second width is smaller than the third width.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M. Mitchell whose telephone number is (571) 272-1931. The examiner can normally be reached on M-F 6:30-3:30.

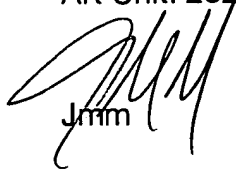

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on (571) 272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
